Thomas Whitman
Sr. Engineering Geologist
State of California –
Department of Transportation (Caltrans)
November 1990 – Present

Mr. Whitman is involved in all aspects of Engineering Geology as it relates to highway transportation systems. He specializes in landslide and rock slope investigation in very difficult terrain. With over 19 years of mountaineering and climbing experience, Mr. Whitman is a lead instructor for the Caltrans climbing and bank-scaling program.

As a representative of an asset “owner” and an accomplished climber/scaler, Mr. Whitman understands in great depth the issues with, and value of, site slope assessments (SSA).

This 60-minute webinar will:

- Briefly outline the process and procedures associated with SSA
- Identify the stakeholders in the SSA process – there are more than you might think!
- Discuss the direct and indirect benefits of SSA for each of the stakeholders
 - SSA purposes/uses
 - Values for each stakeholder

Presented by The Association of Geohazard Professionals (AGHP), a non-profit organization created in 2013 to support the development of standards, specifications, and best practices concerning the design and implementation of geohazard-related technologies and products and to provide education to the geohazard community and those it serves.
